Did You Know?

Mecardonia grandiflora 'Garden Freckles'[™]

Just the name alone tells you that this darling plant is one you'll want to add to your garden. *Mecardonia grandiflora* 'Garden Freckles'[™] is a low-growing - slightly mounding and spreading annual (or tender perennial) that is covered with masses of bright yellow blooms. The Sunset Climates Zones are 3-24, and it may overwinter where temperatures stay above 25°F.

'Garden Freckles'[™] grows 4-6 inches tall x 10-12 inches wide, and blooms from spring through first frost. It is easy to grow, requires no dead-heading and has excellent landscape performance. Use it as a ground cover, in borders, along the edge of a garden path, or in rock gardens. Its trailing habit makes it ideal for window boxes and containers as the flower-covered stems billow over the sides of the pot.

Companion plant with *Linaria* 'Northern Lights', *Bacopa* 'MegaBloom White', *Lobelia* 'Crystal Palace' and *Viola* 'Penny Primrose Picotee' for a delightful fall-winter garden. We are currently growing *Mecardonia grandiflora* 'Garden Freckles'[™] in one gallon containers. Visit our website www.clearwatercolor.com to see photos of these and many other plants we are growing and as always, we invite you to follow us on Instagram and Facebook @clearwatercolornursery.
